JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Alkali metals
Angular distribution in the 1s → 3p coherently excited resonant *KLL* Auger spectrum in neon 249
Autoionization as a tool for studying adsorbed atoms and molecules 1
Changes in oxygen Auger spectra induced by potassium in the Ni(100)–O/K coabsorption system 43
Potential parameters for analysis of chemical shifts for the elements lithium to argon 261
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator 187
Alloy
Calculated Auger transition probabilities: from free atom to solids 181
Copper L_3-$M_{4,5}M_{4,5}$ Auger and Auger satellite structures in polycrystalline $Cu_{50}Pd_{50}$ alloy 217
Core hole screening and electronic structure information 199
Does the Friedel–Anderson model give a good account of the d levels of dilute transition metals in magnesium and aluminium alloys? 195
Aluminium
Core-valence (*KLV*, *KVV*, *LVV*) Auger and high resolution valence band XPS spectra of aluminium: a comparison with the results of cluster MO calculations 157
Methods and applications for the deconvolution of (Auger) electron spectroscopy data 311
The localisation of 3d hole states in Fe and FeAl studied by Auger vacancy satellite spectroscopy 205
Angle resolved Auger spectroscopy
Angle resolved Auger electron spectroscopy: an alternate tool for identifying electronic excitation processes in solids 169
Appearance potential spectroscopy
Two-particle spectra of heavy fermion systems 229
Auger electron spectroscopy
An AES study of the Si–Gd interface electronic structure 55
An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface 71
Angle resolved Auger electron spectroscopy: an alternate tool for identifying electronic excitation processes in solids 169
Angular distribution in resonant Auger decay of atoms and molecules 243
Auger and autoionisation spectra of rare earths 133
Auger and photoelectron spectra of K^+ in solids at resonant $2p^6$ to $2p^5 3d$ excitation 127
Auger line shape measurements using positron annihilation induced Auger electron spectroscopy 305
Auger lineshape modulation by scattering-interference of primary electrons 299
Band gap, excitons and Coulomb interactions of solid C_{60} 83
Calculated Auger transition probabilities: from free atom to solids 181
Changes in oxygen Auger spectra induced by potassium in the Ni(100)–O/K coadsorption system 43
Comparison of linewidths for resonant Auger and normal Auger spectra 267
Copper L_3-$M_{4,5}M_{4,5}$ Auger and Auger satellite structures in polycrystalline $Cu_{50}Pd_{50}$ alloy 217
Core hole screening and electronic structure information 199
Core-valence (*KLV*, *KVV*, *LVV*) Auger and high resolution valence band XPS spectra of aluminium: a comparison with the results of cluster MO calculations 157
EXFAS studies on the thermal behaviour of copper surfaces 223
Extra-atomic relaxation energy calculations using an extended potential model 255
High energy Auger satellites of the 4d transition metals 211
Influence of electron correlations on Auger spectra of solids with partially filled bands 163
$L_{23}MM$ resonant Auger spectra of Mn in $KMnF_3$ 113
$L_3M_{4,5}M_{4,5}$ spectator Auger processes in 4d transition metal compounds 107

Methods and applications for the deconvolution of (Auger) electron spectroscopy data 311
MNN resonant Auger spectra of Ce in $CeCl_3$ 119
On Auger *CVV* line shapes from covalently bonded solids 77
One-, two- and three-body features in Auger *CVV* spectra 151
Potential parameters for analysis of chemical shifts for the elements lithium to argon 261
Recombination spectra of some solid rare earths excited by monochromatic and non-monochromatic synchrotron radiation 327
Resonant Auger spectroscopy of atoms and molecules 235
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator 187
The localisation of 3d hole states in Fe and FeAl studied by Auger vacancy satellite spectroscopy 205
The role of off-site interactions in the theory of *CVV* Auger spectra in solids 141

Auger parameter
Angular distribution in the 1s → 3p coherently excited resonant *KLL* Auger spectrum in neon 249
Auger and autoionization spectra of rare earths 133
Comparison of linewidths for resonant Auger and normal Auger spectra 267
Core hole screening and electronic structure information 199
Extra-atomic relaxation energy calculations using an extended potential model 255
Potential parameters for analysis of chemical shifts for the elements lithium to argon 261
The use of the Auger parameter in the characterisation of some silicon compounds 97

Auger photoelectron coincidence spectroscopy
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids 289

Band structure
Band gap, excitons and Coulomb interactions of solid C_{60} 83
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements 323
Core-valence (*KLV*, *KVV*, *LVV*) Auger and high resolution valence bands XPS spectra of aluminium: a comparison with the results of cluster MO calculations 157
Does the Friedel–Anderson model give a good account of the d levels of dilute transition metals in magnesium and aluminium alloys? 195
Influence of electron correlations on Auger spectra of solids with partially filled bands 163

Carbon
An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface 71
Band gap, excitons and Coulomb interactions of solid C_{60} 83
Electronic properties of ion implanted hydrogenated amorphous carbon 89

Carbon monoxide
An adiabatic model of chemisorbed molecules: electron spectroscopy and excited-state potential-energy surfaces 9
Angle resolved autoionization spectra of adsorbates on metal oxide surfaces 37

Charge transfer
Auger and autoionisation spectra of rare earths 133
MNN resonant Auger spectra of Ce in $CeCl_3$ 119
Potential parameters for analysis of chemical shifts for the elements lithium to argon 261
The dynamics of core hole excitations and decay in adsorbed and condensed molecules on solid surfaces 19

Chemisorption theory
An adiabatic model of chemisorbed molecules: electron spectroscopy and excited-state potential-energy surfaces 9

Cobalt
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids 289

Copper
Angle resolved Auger electron spectroscopy: an alternate tool for identifying electronic excitation processes in solids 169
Auger line shape measurements using positron annihilation induced Auger electron spectroscopy 305
Copper L_3-$M_{4,5}M_{4,5}$ Auger and Auger satellite structures in polycrystalline $Cu_{50}Pd_{50}$ alloy 217
Core hole screening and electronic structure information 199
EXFAS studies on the thermal behaviour of copper surfaces 223
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator 187
The peculiarities of the electronic structure of La_2CuO_4 and $YBa_2Cu_3O_{7-\delta}$ compounds 101

Dynamics
The dynamics of core hole excitation and decay in adsorbed and condensed molecules on solid surfaces 19

EELS
An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface 71
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements 323
Electronic properties of ion implanted hydrogenated amorphous carbon 89
High-resolution electron energy analyser for angle-resolved spectroscopy 317
Methods and applications for the deconvolution of (Auger) electron spectroscopy data 311
Electron diffraction
Auger lineshape modulation by scattering-interference of primary electrons 299
Electron emission
Angular distribution in resonant Auger decay of atoms and molecules 243
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements 323
High-resolution electron energy analyser for angle-resolved spectroscopy 317
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator 187
Electron microscopy
Photoemission spectromicroscopy in materials science and in neurobiology 281
Electron scattering
Auger lineshape modulation by scattering-interference of primary electrons 299
Electron stimulated desorption
Valence excitation and ESD of Cl^+ ions from the Cl/Si(100) interface 31
Epitaxy
Sensitivity analysis of dipole layers at semiconductor interfaces 49

Fullerene
An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface 71
Band gap, excitons and Coulomb interactions of solid C_{60} 83

Gallium arsenide
A photoemission study of the (2×2) reconstruction of GaAs{111} surfaces 65
Sensitivity analysis of dipole layers at semiconductor interfaces 49
Surface density of states of Sb/GaAs(110) and H:GaAs(100) by metastable deexcitation spectroscopy 59
Gold
The role of off-site interactions in the theory of *CVV* Auger spectra in solids 141

Halogen
Potential parameters for analysis of chemical shifts for the elements lithium to argon 261
Valence excitation and ESD of Cl^+ ions from the Cl/Si(100) interface 31

Indium phosphide
Auger lineshape modulation by scattering-interference of primary electrons 299
Ion scattering
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements 323
Iron
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids 289
The localisation of 3d hole states in Fe and FeAl studied by Auger vacancy satellite spectroscopy 205

Lanthanide
Auger and autoionisation spectra of rare earths 133
MNN resonant Auger spectra of Ce in $CeCl_3$ 119
Low energy electron diffraction
A photoemission study of the (2×2) reconstructions of GaAs{111} surfaces 65

Metal
Calculated Auger transition probabilities: from free atom to solids 181
Influence of electron correlations on Auger spectra of solids with partially filled bands 163
Molecular beam epitaxy
A photoemission study of the (2×2) reconstructions of GaAs{111} surfaces 65

Neurobiology
Photoemission spectromicroscopy in materials science and in neurobiology 281
Nickel
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids 289
Autoionization as a tool for studying adsorbed atoms and molecules 1
Changes in oxygen Auger spectra induced by potassium in the Ni(100)–O/K coadsorption system 43
Nickel oxide
Angle resolved autoionization spectra of adsorbates on metal oxide surfaces 37

Nitrogen
Soft X-ray fluorescence spectroscopy using tunable synchrotron radiation 273
Noble gas
Angular distribution in resonant Auger decay of atoms and molecules 243
Angular distribution in the 1s → 3p coherently excited resonant *KLL* Auger spectrum in neon 249
Resonant Auger spectroscopy of atoms and molecules 235
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator 187
Noble metal
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids 289
The role of off-site interactions in the theory of *CVV* Auger spectra in solids 141

Oxide
Angle resolved autoionization spectra of adsorbates on metal oxide surfaces 37
$L_3M_{4,5}M_{4,5}$ spectator Auger processes in 4d transition metal compounds 107
The use of the Auger parameter in the characterisation of some silicon compounds 97
Oxygen
Changes in oxygen Auger spectra induced by potassium in the Ni(100)–O/K coadsorption system 43
The peculiarities of the electronic structure of La_2CuO_4 and $YBa_2Cu_3O_{7-\delta}$ compounds 101

Palladium
Copper L_3-$M_{4,5}M_{4,5}$ Auger and Auger satellite structures in polycrystalline $Cu_{50}Pd_{50}$ alloy 217
Core hole screening and electronic structure information 199
High energy Auger satellites of the 4d transition metals 211
Photoelectron spectroscopy
A photoemission study of the (2 × 2) reconstructions of GaAs{111} surfaces 65
An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface 71
Angle resolved autoionization spectra of adsorbates on metal oxide surfaces 37
Auger and autoionisation spectra of rare earths 133
Auger and photoelectron spectra of K^+ in solids at resonant $2p^6$ to $2p^53d$ excitation 127
Comparison of linewidths for resonant Auger and normal Auger spectra 267
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements 323
Core-valence (*KLV*, *KVV*, *LVV*) Auger and high resolution valence band XPS spectra of aluminium: a comparison with the results of cluster MO calculations 157
Extra-atomic relaxation energy calculations using an extended potential model 255
High-resolution electron energy analyser for angle-resolved spectroscopy 317
$L_{23}MM$ resonant Auger spectra of Mn in $KMnF_3$ 113
MNN resonant Auger spectra of Ce in $CeCl_3$ 119
Photoemission spectromicroscopy in materials science and in neurobiology 281
Potential parameters for analysis of chemical shifts for the elements lithium to argon 261
Photon spectroscopy
The dynamics of core hole excitation and decay in adsorbed and condensed molecules on solid surfaces 19
Positron spectroscopy
Auger line shape measurements using positron annihilation induced Auger electron spectroscopy 305

Raman scattering
$L_3M_{4,5}M_{4,5}$ spectator Auger processes in 4d transition metal compounds 107
Rare earth
An AES study of the Si–Gd interface electronic structure 55
Auger and autoionisation spectra of rare earths 133
Recombination spectra of some solid rare earths excited by monochromatic and non-monochromatic synchrotron radiation 327
Resonance
Comparison of linewidths for resonant Auger and normal Auger spectra 267
Resonant Auger decay
Resonant Auger spectroscopy of atoms and molecules 235

Semiconductor
A photoemission study of the (2 × 2) reconstructions of GaAs{111} surfaces 65
An AES study of the Si–Gd interface electronic structure 55
Photoemission spectromicroscopy in materials science and in neurobiology 281
Sensitivity analysis of dipole layers at semiconductor interfaces 49
Silicon
An AES study of the Si–Gd interface electronic structure 55

On Auger *CVV* line shapes from covalently bonded solids 77
Valence excitation and ESD of Cl^+ ions from the Cl/Si(100) interface 31
Silicon oxide
The use of the Auger parameter in the characterisation of some silicon compounds 97
Silver
An experimental study of the electronic structure of C_{60} films grown at the Ag(110) surface 71
High energy Auger satellites of the 4d transition metals 211
The role of off-site interactions in the theory of *CVV* Auger spectra in solids 141
Simple metal
Angular distribution in resonant Auger decay of atoms and molecules 243
Comparison of linewidths for resonant Auger and normal Auger spectra 267
Does the Friedel–Anderson model give a good account of the d levels of dilute transition metals in magnesium and aluminium alloys? 195
Soft X-ray fluorescence
Extended abstract: electron correlation in CaF_2 studied in threshold excited soft X-ray fluorescence 125
Soft X-ray fluorescence spectroscopy using tunable synchrotron radiation 273
Spin resolved spectroscopy
Spin resolved Auger electron spectroscopy after photoexcitation with circularly polarized radiation from the BESSY crossed undulator 187
Superconductivity
The peculiarities of the electronic structure of La_2CuO_4 and $YBa_2Cu_3O_{7-\delta}$ compounds 101
Surface morphology
Photoemission spectromicroscopy in materials science and in neurobiology 281
Surface phonons and adsorbate vibrations
High-resolution electron energy analyser for angle-resolved spectroscopy 317
Surface plasmon
High-resolution electron energy analyser for angle-resolved spectroscopy 317
Surface state and interface states
Surface density of states of Sb/GaAs(110) and H:GaAs(110) by metastable deexcitation spectroscopy 59
Surface structure
A photoemission study of the (2×2) reconstructions of GaAs{111} surfaces 65
Auger lineshape modulation by scattering-interference of primary electrons 299
Cone electrostatic energy analyser, used for concurrent energy-resolved and angle-resolved measurements 323
High-resolution electron energy analyser for angle-resolved spectroscopy 317

Titanium
One-, two- and three-body features in Auger *CVV* spectra 151
Transition metal
Auger photoelectron coincidence spectroscopy (APECS): a tool for understanding Auger emission from solids 289
Core hole screening and electronic structure information 199
Does the Friedel–Anderson model give a good account of the d levels of dilute transition metals in magnesium and aluminium alloys? 195
Extra-atomic relaxation energy calculations using an extended potential model 255
High energy Auger satellites of the 4d transition metals 211
Influence of electron correlations on Auger spectra of solids with partially filled bands 163
$L_3M_{4,5}M_{4,5}$ spectator Auger processes in 4d transition metal compounds 107

X-ray absorption
Autoionization as a tool for studying adsorbed atoms and molecules 1
$L_{23}MM$ resonant Auger spectra of Mn in $KMnF_3$ 113
L_3-$M_{4,5}M_{4,5}$ spectator Auger processes in 4d transition metal compounds 107
Photoemission spectromicroscopy in materials science and in neurobiology 281

Zinc
Comparison of linewidths for resonant Auger and normal Auger spectra 267
